

# SERVICE END

The Service End is designed for bare neutral messengers, used in the realization of service branches, they are designed to be used on self-supporting cables (ACSR, AAC, AAAC). Service End are partial tension devices and will retain a minimum of 50% rated breaking strength of the cable. Must be firmly attached to the cable at its end point. This product is made of galvanized steel.

**Here is a guide to understanding the catalog number.** It is divided into 2 parts, ex: **10-SSG**, **10** is the length in inches and **SSG** is for "Service ends".

CABLE Dimension A.W.G.	Diameter	CATALOG		DESCRIPTION		
		PAYER code	Reference	Packaging	Length ± Inch	Color Payer / reference
#6	,169 / ,198	10-SSG		100	10	Blue
