

VINE WIRE SPLICE

Galvanized for wire

The steel splices is a product especially conceived to repair or connect a steel wire. Used adequately, the splice reaches its maximum fracture capacity when the cable is made according to standard ASTM-A475 and/or CSA-G12 specifications. Once installed, the splice may not be re-used after a month. This product is produced in class A steel, grade 180 (CSA-G12 / ASTM-A475).

STRAND			CATALOG		DESCRIPTION	
Gauge	Diameter (in)	Diameter (mm)	Catalog number	Reference number	Packaging	Color
15	,072	0,195	15-VL	2602-100	50 sets	Red
